

## Call for contributions SAIP2021

### Physics for Development, Education and Outreach

The SAIP would like to invite interested stakeholders of the physics community to submit abstracts and contributions to a new interdisciplinary track of the SAIP conference. The new track is named **Physics for Development, Education and Outreach**.

Creation of this track has been necessitated by the fact that we found that many people are interested in Physics in Industry Day, Gender, Diversity, and Women in Physics matters, Physics for Socio-Economic Development, Physics Education, Outreach and Science Communication matters. However, members interested in these topics are dotted across the seven SAIP divisions, hence this will create a common platform for all divisions, to discuss cross cutting matters that are central to increasing the impact of physics.

We are therefore inviting contributions to this new track at SAIP2021. Please submit your abstracts online at <https://events.saip.org.za/e/saip2021>
