

## **MSc and PhD Bursaries in Machine Learning and Internet of Things**

The Institute for Collider Particle Physics, invites applications for MSc and PhD bursaries to work on projects involving Machine Learning and Internet of Things. These include projects in collaboration with the Technology Innovation Platform of iThemba LABS of the National Research Foundation, the European laboratory CERN, York University in Canada and other international collaborators in research and industry.

Students with engineering background are particularly encouraged to apply.

Interested candidates should send (electronic submission in PDF format is preferred) a curriculum vitae, relevant academic transcripts, a statement of research interests and two letters of recommendation.

The package of documentation needs to be sent to Prof. Bruce Mellado ([bmellado@mail.cern.ch](mailto:bmellado@mail.cern.ch)).

Applications received by January 31<sup>st</sup> 2024 will receive full consideration.
